

Experience

UI/UX Lecturer

Academy of digital industries

2024 - Present

Georgia / Tbilisi

The Academy of Digital Industries in Tbilisi, Georgia, focuses on equipping students with skills relevant to the digital economy. It typically offers courses in areas such as digital marketing, web development, design, and data analysis.

- Delivered comprehensive lectures on UX design principles, Wireframing, Prototyping, Agile methodologies, and project management to students
- Guided students through hands-on projects from the start of their studies, ensuring practical application of concepts.
- Developed exercises and assignments that simulated real-world company workflows, enhancing students' understanding of UX processes.
- Instructed students on using frameworks - Design Thinking, Design Sprints

UI/UX Lecturer

Business and technology university

2022 - Present

Georgia / Tbilisi

Business and Technology University represents higher education and research unit that integrates business and modern digital technologies. Teaching, education and research activities are held by consolidating students, academic staff and researchers.

- Developed and delivered comprehensive courses on UX design, focusing on user-centered design principles, usability testing, and interface design.
- Facilitated engaging classroom discussions and hands-on workshops to enhance students' practical skills in UX tools and methodologies.
- Mentored students on real-world projects, guiding them through the design process from research to prototyping and user testing.
- Collaborated with industry professionals to integrate current trends and technologies into the curriculum, ensuring students are equipped with relevant skills.
- Evaluated student performance and provided constructive feedback to foster their growth and understanding of UX concepts.
- Contributed to the university's academic community by participating in curriculum development and faculty workshops.

UI/UX Designer

Topwork

2022 - 2023

Georgia / Tbilisi

Topwork was an innovative online platform designed to empower freelancers in Georgia by providing them with the tools and resources necessary for success. The platform aimed to connect freelancers with clients, facilitate project management, and offer educational resources tailored to the local market.

- Led the design process for a platform aimed at supporting Georgian freelancers, focusing on user experience and interface design.
- Conducted in-depth research, including peer-to-peer interviews and surveys, to gather insights on user needs and preferences.
- Collaborated with a cross-functional team to ideate innovative solutions based on research findings, ensuring alignment with business objectives.
- Developed wireframes and prototypes for a responsive web design, facilitating user testing to refine and enhance the user interface.
- Created a sustainable business model that addressed the unique challenges faced by freelancers in Georgia, positioning the startup for success in the market.

Freelance UI/UX Designer

Self-Employed

2022 - Present

Georgia / Tbilisi

As a freelance UX Designer, I work on a variety of personal projects from home, focusing on creating user-centered designs that enhance user experiences across digital platforms. My approach combines research, design, and testing to deliver intuitive and engaging interfaces.

- Conduct user research, including interviews and surveys, to gather insights and understand user needs.
- Develop wireframes and interactive prototypes for web and mobile applications, ensuring a seamless user experience.
- Collaborate with clients to define project goals and design specifications, aligning with their vision and business objectives.
- Perform usability testing to gather feedback and iterate on designs for continuous improvement.
- Stay updated on industry trends and best practices to implement innovative design solutions.
